

March 20, 2020

Dear Healthcare Professional,

In the event that the novel coronavirus worsens on the island of St. Croix, we need the help of additional, qualified health professionals to supplement the capacity of the Governor Juan F. Luis Hospital & Medical Center, on a temporary basis, to treat seriously ill coronavirus patients, including those that may need to be intubated.

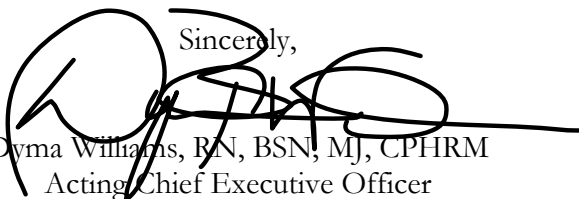

If you are available, we need the following information:

- Your specific qualifications and experience
- Date of last certification and license
- Last date of practice
- Role in last practice
- Contact information, including physical address and cell phone number
- Current age
- Description of your interest and ability to be able to provide your services to treat patients if the need should arise in the future.

Please provide these responses within 36 hours of your receipt of this correspondence to tlynch@jflusvi.org. Your immediate attention is necessary and appreciated.

With your help, JFL is working to protect the residents of St. Croix through preparation. We appreciate your commitment to the health and wellness of the St. Croix community.

Sincerely,

Dyma Williams, RN, BSN, MJ, CPHRM
Acting Chief Executive Officer
