

VIDOH 2020 COVID-19 Response Report date: April 06, 2020

USVI Response Measures

1. Prevent, delay, and mitigate transmission:

Develop screening at ports of entry; provide best practices and guidance to organizations to reduce transmission; develop strategies for vulnerable populations.

2. Conduct surveillance: Inform the response based on epidemiologic data; liaise with healthcare sector to identify cases and define clinical and transmission characteristics; operate epi hotline; track persons under investigation; perform contact tracing of cases; conduct follow-up sampling of cases; coordinate with lab on specimens.

3. Provide public health & safety messaging:

Develop communication strategy; build capacity with partners; provide daily .

4. Provide medical guidance: Provide Infection Prevention and Control guidance related to healthcare personnel and health systems; provide guidance to clinicians regarding treatment and management of patients;

5. Conduct lab testing: Build laboratory testing capacity for VIDOH; explore external laboratory capacity; manage specimen collection; and manage lab supplies.

6. Coordinate medical surge capacity: Assess resource needs and inventory resources (equipment, supplies, staff); develop a health and medical staffing strategy: prepare resource requests for material aid and staff (federal partner, EMAC, etc); develop resource management, utilization, and prioritization plan (PPE, staffing).
